** **CLIN** Structure: CLINs are created by appending 'AA' for License or 'AC' for Software Update License & Support to the specified prefix.

The BPA Prices set forth above in Exhibit A-1 are perpetual license prices. Term licensing is available for all Oracle Products listed in Exhibit A-1. The BPA price for a term license is based on a specific percentage of the BPA perpetual license price. Annual term licenses are available from 1 to 5 years: 1 year - 20% of BPA perpetual license price; 2 year - 35% of BPA perpetual license price; 3 year - 50% of BPA perpetual license price; 4 year - 60% of BPA perpetual license price and 5 year - 70% of BPA perpetual license price; Support for all term licenses is 22% of BPA net perpetual license price. Exception: support fees for the Collaboration programs are 25% of BPA net perpetual license price. The price for Technical Support is the same whether the software license is perpetual or term. Example: The BPA price for a 2-year term license with 12-months of Technical Support for 1 processor of Oracle Database Enterprise Edition would be $10,810.49 (License: $18,965.77*0.35 = $6,638.02; Support: $4,172.47)

** **CLIN** Structure: CLINs are created by appending 'AA' for License or 'AC' for Software Update License & Support to the specified prefix.

The BPA Prices set forth above in Exhibit A-2 are perpetual license prices. Term licensing is available for all Oracle Products listed in Exhibit A-2. The BPA price for a term license is based on a specific percentage of the BPA perpetual license price. Annual term licenses are available from 1 to 5 years: 1 year - 20% of BPA perpetual license price; 2 year - 35% of BPA perpetual license price; 3 year - 50% of BPA perpetual license price; 4 year - 60% of BPA perpetual license price and 5 year - 70% of BPA perpetual license price; Support for all term licenses is 22% of BPA net perpetual license price. Exception: support fees for the Collaboration programs are 25% of BPA net perpetual license price. The price for Technical Support is the same whether the software license is perpetual or term. Example: The BPA price for a 2-year term license with 12-months of Technical Support for 1 processor of Healthcare Transaction Base would be $27,026.22 (License: $47,414.43*0.35 = $16,595.05; Support: $10,431.17)

Oracle E-Business Suite Footnotes

1 An option must be licensed at the same level (or greater than) as its parent. Example: number of Flow Manufacturing users = number of Discrete Manufacturing users. If the parent has multiple metrics, the option must be licensed at the same level as its parent for each metric. Example: number of Advanced Pricing users = number of Order Management users AND number of Advanced Pricing Electronic Order Lines = number of Order Management Electronic Order Lines.

2 Primary Usage: is defined as each User of the following applications: Financials, Discrete Manufacturing, Process Manufacturing, Project Costing and Purchasing. Each such User is counted only once based on primary usage. Ordering activity must specify how many Users ordering activity is licensing for each application. Primary Usage of one of the applications listed above provides the User with the right to use any or all of the other application programs listed above for which ordering activity is licensed. Primary Usage does not provide ordering activity with the right to use other application programs including the extensions or options to the application programs listed

3 Order Management is licensed based upon the number of application users AND the number of order lines entered from any source other than those entered by licensed Order Management Users. Order Management User licenses are required for all individuals who are using Order Management. In addition, any order that is entered electronically into Order Management must be licensed using the Electronic Order Line metric. This applies to order lines originating in iStore, Quoting, EDI/XML transactions, legacy applications or any other source. (Order lines entered manually by the licensed Order Management users are covered under the Order Management

4 For the purpose of licensing this program (except Healthcare Transaction Base and Customer Data Hub), only the processors on which iAS Standard Edition and/or Enterprise Edition and this program are running are counted for the purpose of determining the number of processors required to license this program.

For the purpose of licensing Healthcare Transaction Base, only the processors on which iAS Enterprise Edition and this program are installed and/or running are counted for the purpose of determining the number of processors required to license this program. For the purpose of licensing Customer Data Hub, only the processors on which Oracle Database Enterprise Edition and this program are running in production are counted for the determining the number of licenses required to license this program.

5 The number of Applications Users for Tutor for Applications must match the number of Application Users of each Application for which the ordering activity is using Tutor. If the application is licensed with a metric based on all the individuals in an organization, i.e., Person, Employee, then everyone in the LOB or organization must be licensed using the Self Service Tutor for Applications. If the application is licensed with any other metric, i.e., Purchase Line, Order Line, then the number of Application Users for Tutor for Applications must match the number of Application Users that the ordering activity would have licensed for the application, had this metric been

6 Configurator can be licensed by Application User OR by Processor. If licensing by Application User, then the actual users accessing Configurator must be counted. If the user population accessing Configurator is uncountable, then the Processor metric must be used.

7 If licensed with Clinical, the total number of application users and application read-only users of Thesaurus Management System must match the number of application users of Clinical. If licensed separately, the minimum of application users for Thesaurus Management System is 1, the minimum of application read-only users is 5.

8 Ordering activities must pay for both the module and the subscriber/workstation fee.

9 Separate Remote Data Capture licenses are required for remote site-based data entry. In-house entry users require Clinical licenses. Remote Data Capture is licensed by Application User when the annual CRF Page volume cannot be estimated, or if it is more cost effective.

13 If Managed Assets are $10 billion or less, the price per $M in Managed Assets is 2,000. If Managed Assets are greater than $10 billion, the price per $M in Managed Assets for the first 10,000 licenses is 2,000, and the price per $M in Managed Assets for each additional license is 1,000.

15 Where Inventory Management is licensed across multiple plants or warehouses, the Inventory Management options (Mobile Supply Chain Applications, Warehouse Management, Transportation) can be licensed individually for each plant/warehouse. Within each plant/warehouse using the Inventory option, the option must be licensed at the same user count as Inventory Management or the actual user count, whichever is greater.

16 Where Discrete Manufacturing is licensed across multiple plants, the Discrete Manufacturing options (Mobile Supply Chain Applications, Flow Manufacturing, Manufacturing Scheduling) can be licensed individually for each plant. Within each plant using the Manufacturing option, the option must be licensed at the same user count as Discrete Manufacturing or the actual user count, whichever is greater.

17 Where Projects is licensed across many lines of business, the Project Billing option to Project Costing can be licensed individually for each line of business using the Oracle Projects solution. Within each line of business using the Project Billing option, the option must be liensed at the same user count as Project Costing.

19 2, 3, 4 and 5-Year Term Licenses are not available for Collaboration products. Customers must purchase Software Updates when purchasing Product Support.

20 Where Process Manufacturing is licensed across multiple plants, the Process Manufacturing options can be licensed individually for each plant. Within each plant using the Manufacturing option, the option must be licensed at the same user count as Process Manufacturing or the actual user count, whichever is greater.

21 Sales Contracts Application User licenses are required for all contract administrators, legal staff, order administrators and sales personnel who manage the contracts library or author contracts.

22 When licensing User Productivity Kit, ordering activity must license at least one UPK Developer and either UPK Users or UPK Employees.

23 Term Licenses are not available for User Productivity Kit.

25 If you license the Self Service Work Request option in conjunction with EAM, you are required to maintain licenses for the equivalent number of EAM Users licensed and you are granted unlimited access to initiate work requests, view work request status and view scheduled completion date for your entire employee population.

The BPA Prices set forth above in Table 2a are perpetual license prices. Term licensing is available for all Oracle Products listed in Table 2a. The GSA price for a term license is based on a specific percentage of the BPA perpetual license price. Annual term licenses are available from 1 to 5 years: 1 year - 20% of BPA perpetual license price; 2 year - 35% of BPA perpetual license price; 3 year - 50% of BPA perpetual license price; 4 year - 60% of BPA perpetual license price and 5 year - 70% of BPA perpetual license price. Support for all term licenses is 22% of BPA net perpetual license price. The price for Technical Support is the same whether the software license is
